

# Overview of possible connecting threads

Transition from fitting to Quick & Clean Anti-Calc System

**QUICK & CLEAN**  
ANTI-CALC SYSTEM

Transition from Quick & Clean Anti-Calc System to connection shower hose

Initial situation: Fitting	Piece required for transition Q & C	Sample image adapter fitting → Q & C
1/2 inch external thread	No adapter required	
1/2 inch internal thread	Adapter 1/2 inch external thread on 1/2 inch external thread  Standard seal on the internal thread of the fitting (should already be there)	
3/4 inch external thread	Reducer 3/4 inch internal thread (flat seal) on 1/2 inch external thread  Standard seal 3/4 inch on the internal thread of the connection piece	
3/8 inch external thread	Extension piece 3/8 Inch Internal thread (flat seal) on 1/2 inch external thread  Standard seal 3/8 inch on the internal thread of the connection piece	
3/4 inch internal thread	Adapter 3/4 inch external thread on 1/2 inch external thread  Standard seal 3/4 inch on the internal thread of the fitting (should already be there)	
3/8 inch internal thread	Adapter 3/8 inch external thread on 1/2 inch external thread	
1/2 inch external thread – but fitted laterally	Elbow joint 1/2 inch internal thread (flat seal) on 1/2 inch external thread  NB: sufficient space for fitting required! Standard seal 1/2 inch for internal thread	

Initial situation: Shower hose	Piece required for transition Q & C	Sample image adapter Q & C → Schlauch
1/2 inch internal thread	No adapter required	
1/2 inch external thread	Adapter 1/2 inch internal thread (flat seal) on 1/2 inch internal thread  Seal: 2 standard 1/2 inch seals in the adapter (if flat seal)	
3/4 Inch internal thread	Nipple piece 1/2 inch internal thread (flat seal) on 3/4 inch external thread  Standard 1/2 inch seal on the nipple piece	
3/8 Inch internal thread	Nipple piece 1/2 inch internal thread (flat seal) on 3/8 inch external thread  Standard 1/2 inch seal on the nipple piece	
3/4 inch external thread	Nipple piece 1/2 inch internal thread (flat seal) on 3/4 inch external thread  Standard 1/2 inch seal on the nipple piece	
3/8 Inch External thread	Adapter 1/2 inch internal thread on 3/8 inch external thread	
1/2 Inch Internal thread	No adapter required	

**TIP:** In the event of difficulties sealing the adapter (or if there is no flat seal adapter or no seal available), we recommend using a standard Teflon tape.
